

CASE STUDY

How Automated Billing Uncovered ₹12 Cr in Hidden Transport Costs

“₹12 crores recovered in year one, and we didn't change a single route. Routematic exposed billing leaks we didn't know existed.”

-IT consulting company

Routematic

Industry

IT consulting

Operations

24x7 schedule,
4000+ daily trips
across cities

Location

8 cities in India

Transport users

16,500

The Problem: Rising Costs, Zero Visibility

The billing system was leaking money silently despite scale:

7Cr Monthly Billed Despite
Reduced Travel

Fixed charge levied under a trip model
despite fewer kilometers being travelled

2x Counted Escort Trips
Caused Overbilling

Back-to-back trips were being counted
twice, leading to overbilling

The Routematic Fixed This

₹8.28 Cr Saved with KM-Based Billing

- Switched from trip-based to **GPS-driven km-based pricing** for precise distance tracking.
- Delivered **₹1 Cr monthly savings**, with **₹69L from km-based billing**, scaling to **₹8.28 Cr annually**.

Just smarter billing from Day 1

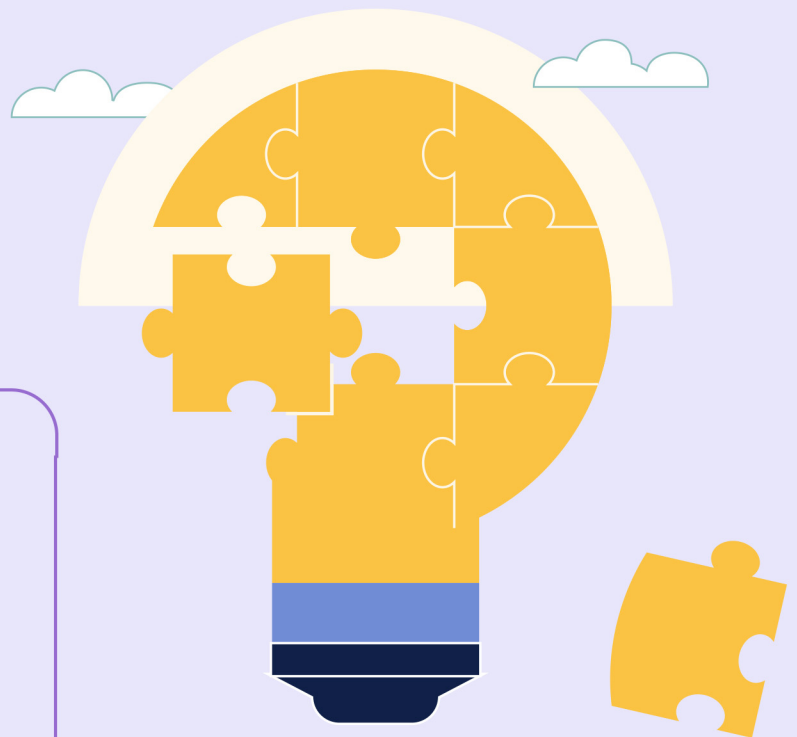

Escort misuse prevention logic

No schedule, SLA, or vendor changes

Smart, audit-ready trip billing

37% Savings on Escort Guard Trip Billing

- **Reduced escort guard trip billing by 37%** through data-driven trip validation.
- Achieved **₹31L monthly savings**, scaling to **₹3.7 Cr annually**.
